Harvard Business Review Press Jan 2002, 2002. Buch. Book Condition: Neu. 248x168x27 mm. Neuware - Today's marketplace is fueled by knowledge. Yet organizing systematically to leverage knowledge remains a challenge. Leading companies have discovered that technology is not enough, and that cultivating communities of practice is the keystone of an effective knowledge strategy. Communities of practice come together around common interests and expertise- whether they consist of first-line managers or customer service representatives, neurosurgeons or software programmers, city managers or home-improvement amateurs. They create, share, and apply knowledge within and across the boundaries of teams, business units, and even entire companies-providing a concrete path toward creating a true knowledge organization. Through in-depth cases from firms such as DaimlerChrysler, McKinsey&Company, Shell, and the World Bank, the authors demonstrate how communities of practice can be leveraged to drive overall company strategy, generate new business opportunities, tie personal development to corporate goals, transfer best practices, and recruit and retain top talent. They define the unique features of these communities and outline principles for nurturing their essential elements. They provide guidelines to support communities of practice through their major stages of development, address the potential downsides of communities, and discuss the specific challenges of distributed communities. And they show how to recognize the value created by communities of practice and how to build a corporate knowledge strategy around them. Essential reading for any leader in today's knowledge economy, this is the definitive guide to developing...
