There are an infinite number of ways in which we may conceive one quantity y to depend upon, be calculable from, or, in technical mathematical language, be a function of, another quantity x . Thus we may have, for example, $y = Zx$, $y = A$ x b , $y = az$ bz c , and so on. For convenience x is called the independent variable, and y the dependent variable; because we imagine that any value we please is given to x , and the corresponding value of y derived from it by means of the functional relation. All the other symbols of quantity that occur in the above equations, such as 3, 17, a , b , c , VOL. I T 2, and c , are supposed to remain fixed, and are therefore called constants. Here we attach meanings to the words variable and constant more in accordance with their use in popular language than...
