Excerpt: . . . in quantity so far as this surface is concerned, but once past these purifiers there is not usually that necessity for re-purifying as exists in the matter of hard wheat, because the line of pure and impure is more sharply drawn, and the former are practically more free from bran chips, and so can go to a further reduction with less danger than would be the case were their nature the opposite. To go over the ground of purifiers and purification in the form of giving a few questions which involve the main principles treated therein may help to engrain into the readers mind some of the essentials connected with the operation, and may also be of benefit for future reference: --1. Purification: What is it, and for what purpose is it considered necessary in modern flour milling 2. What is the best state for...
